5) My treatment has changed over time because... (Please check all that apply)

Responses:

- Medication not covered by medicare
- Addicted to painkillers, had to stop narcotics
- Seizures/Side effects
- Exercise, lifestyle, diet helped enough to lower pain to livable standards
- Nothing has really helped
- CBD helped, opioid did not
- Difficultly in getting prescription pain medications
- Alternative treatments helped

6) What factors do you take into account when making decisions about selecting a course of treatment? (Please check all that apply)

Responses:

- Spouse
- Medical bulletins
- Experimentation: will try what works!
- Literature, reading
- What works for one does not work for all

7) What are the most significant downsides to your current treatments, and how do they affect your daily life? (Please check all that apply)

Responses

Timing of medication so often during the day
Medication is addictive
Medication wasn't helpful

Meds cause other symptoms/problems
Tolerance build up over time

8) What challenges or barriers to accessing or using medical treatments for chronic pain have you or do you encounter? (Please check all that apply)

Responses:

Still looking for treatments with better efficacy
Alternative treatments not covered by insurance, Medicare

**9) What specific things would you look for in an ideal treatment for your chronic pain?
(Please check all that apply)**

Responses:

All of the above!

Change in federal restriction of availability of medical marijuana as a therapy for chronic pain

10) What concerns, if any, do you have about your current treatment? (Please check all that apply)

Responses:

Concern that the pain will get worse
 Unpredictable results
 Availability of medication
 Alternative treatments: massage acupuncture help but hard to find and not covered by insurance

Concern that the medication will be less effective against the pain
 Dosages keep increasing for similar pain relief
 Fear of losing mobility
 Effects on the brain and other side effects of long term medications
 Options for treatments not sufficient and not safe enough
